RE: Draft Decision Document, Study Area 55, Orlando Naval
Training Center, Orlando, Florida

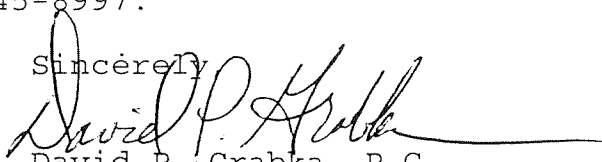

Dear Mrs. Nwokike:

I have completed my review of the Draft Decision Document, Study Area 55, Orlando Naval Training Center, dated June 2004 (received June 14, 2004), prepared and submitted by Tetra Tech NUS, Inc. I have the following comments that should be addressed in the Final Decision Document:

- (1) Please indicate on page 5, second paragraph, the acreage over which the 95% Upper Confidence Limit of the mean or exposure point concentration for benzo(a)pyrene equivalents was calculated. Because the object of soil remediation was to remediate the site to unrestricted reuse, the exposure point concentration should be calculated from data collected over an area not greater than $\frac{1}{2}$ acre.
- (2) On page 5, Soil Removal section, it says a total of 1,086 tons of soil were removed and transported off-site for disposal. This contradicts the Site Investigation Report which documented only 372 tons of soil were excavated and disposed off-site. Please correct the tonnage.

If I can be of any further assistance with this matter, please contact me at (850) 245-8997.

Sincerely,

David P. Grabka, P.G.
Remedial Project Manager
